Technical analysis seminar

Based only and only on Price and 100 % practical approach.

Price is underlying for all technical analysis indicator. It's frustrating to know all about waves and candlesticks, MACD, ADX, CCI, Bollinger Bands ,moving averages and hundreds of chart 'patterns' & not able to make good money..............Why not concentrate only and only on Price from where these indicators are arrived.

You need only 3 technical indicators to run this business: Support, Resistance and Trend. That's' it. We keep it simple. Simple makes money.

Top traders NEVER try to predict the market they only manage risk. Most of the elite traders don't care if the market goes up or down - they make money either way. All top traders do, is manage their risk and take advantage of the only truths of the market - the ONLY absolute truth of the market.

All stocks /commodity/currency fluctuate in price. The study, we are focusing on, works on price and numbers.

What you will Learn

1) W D Gann swing technique

Who doesn't know W D GANN!!! GANN SWING techniques are used for trend determination.

- o GANN SWING techniques are used for trend determination. Square of 9(to calculate exact turning price of market)
