GOLD

CMP: 27776(aug)

Just see the fall as expected in Gold. Below **28000** Gold **C R A S H E D**. For next trading levels join our services

Ultimate target was given 27600-27800 **Our ultimate target is achieved.**

Outlook for current week will be teji till it trades above 27700

Gold will face heavy resistance around 28000 zone

SILVER

CMP: 44896(JUL)

We are very bullish on silver target for 64000. Exact Entry and timing please join our subscription.

Silver is bullish for coming month till trades above 41500. It is heading for target 48000.

INTRAWEEK BULLISH ON SILVER ONLY IF TRADES ABOVE 44600. It can see the level of 48000

For intraday selling pressure can be seen below 44400. If it trades above 44600 go for buying

COPPER

CMP:428.9

Bullish on copper if it trades above 400. **For the target of 418** which we mentioned last week and it has been achieved. now for current week sell copper around 428-430

Today if copper trades above 430, be on long side.

NICKEL

CMP:1146.9

Nickel will be bullish above 1140 zone for target 1180 and 1240

| | |
|---|--------------------|
| NATURAL GAS+ | CMP:269.9 |
| Intraweek natural gas has best support around 260-255 zone fo target 290 | |
| ZINC | CMP: 133.9 |
| ZINC HAS RESITANCE @ 135-137 BAND. EXPECT MANDI IN ZINC IN THIS ZONE. intraweek zinc can be bought above 131 for target 135 | |
| Lead | CMP: 130.05 |
| Intraweek buying can be done in lead above 130 for target 136 140 | |
| CRUDE OIL | CMP: 6337 |
| <p>CRUDE has best support around 5950. If trades below 5950 we expect crude to fall till 5750-5700</p> <p>Be cautious with crude below 6330. Else it is heading for target of 6500 & 6700. Crude should be sold below 6370 for intraweek for target 6250 and 6160. teji in crude only above 6450</p> <p>Today crude should be sold below 6335.</p> | |

25 Trades of May earns 82875

8 Trades of June week1 earns 11740

9 Trades of June week2 earns 86670

10 Trades of June week 3 earns 9240

Note: trading in 2 lots

We proudly say: Our accuracy is 60-70% on an average but 100 % you will be in profit

No trial calls at free of cost

5days trial @ 1500/- per 5 trading days Daily 4-5 calls

Charges Rs.7000/- per month Metals, Bullion, Energy

Newsletter subscription: Charges 2000/- per month and 5000/- per quarter(2 newsletter are provided for paid client in morning 1 in evening—only if major fluctuations

Portfolio advisory on capital above 10 lakhs or minimum 10 lots of gold and silver on sharing model

Can market tops and bottom be predicted????

Yes yes yes!!!!!!!

Answer lies in understanding square of 9

The square of nine popularized by W. D. Gann is very reliable in determining market trends.

It is a useful market tool in almost all markets including indices, stocks, commodities, options and currencies. The numbers in the square of nine can be used as price levels of support and resistance and most importantly as time units. These numbers can be used to count minutes, hours, market days, calendar days, weeks, months and years.

Gann's most valuable contribution to analysis is square of 9 and squaring of price and time to analyse where the top and bottom of the market will be made.

How does it work on Indian stock market.....

We have analysed the intraday data nifty scripts to see whether market top or bottom are predetermined.....

Let us find out

We have taken many active scripts trading trading on intraday and found market tops and bottom out on the level mentioned

Come for seminar to know how everyday market tops and bottom out on the price mentioned.

If market top and bottom can be predicted for 1-2 scripts it can be by luck...but when more than 70% of script top and bottom can be predicted it is science.

Let us see how tops and bottom can be predicted.

Square of nine can perfectly predict which level market will achieve.

Gann swing techniques

Market is made up of bars and we will study this bars to identify trend of market.

Minor level trend analysis is carried out based on bars

Impulse and corrective wave are used to carry out long term trend analysis.

These 2 methods are used to carry out trend analysis.

Gann levels are used to identify zone for trading

Method for long term investor

- **Opportunity to multiply your money 5 times and more**
- **Learn to invest money where everybody is neglecting and at very less risk**

Its 100 % guaranteed, your money will multiply in next 3 years based on script you will select

All these techniques form part of "BECOME MASTER OF BULL AND BEAR SEMINAR

About Speaker: NileshSarda (BE)

NileshSarda, an Engineer, is trader by passion and profession .He has simplified Gann study for common man. Based on the studies a trader can predict tops and bottoms of market. *He has simplified various mathematical calculations* in easy language to interpret. Specially designed excel sheet for Square of 9, Gann levels, Range, are in ready format to trade in market. He makes sure, *every man who has urge to learn*, understands the concepts in very simple manner.

Every script or commodity has particular orientation for square of 9. And its implication is explained very well practically in live market. Gann Square of 9, Gann ABCD patterns, Gann emblem, time projection, Gann angel, Price Overlays, squaring of price and time methods are explained in very simple language for Indian market in live trading.

Major success includes predicting nifty top of 6300 and bottom 4570, silver top of 72000, Lead bottom of 89, zinc bottom of 89, crude bottom of 4480 are recent predictions the list goes on!!!!

Apart from all swings, highs and lows of all commodities and equity are predicted on daily basis on online portal www.moneymint.net & www.valuenotes.com

W. D. Gann

the legendary Financial Prophet in the Early Twenties

To most of the technical analysts and financial traders, the name, William Delbert Gann, is well-known. Gann was one of the greatest traders in the early twenty centuries, who has extremely arcane trading analysis techniques and methods that based on ancient mathematics and geometry. Yet, as it was never unveiled explicitly, the theory of Gann is admired by most, but grasped by few. One of his important techniques, the Gann Square of 9, was said to be inspired from the structure of Egyptian and Indian temples. Unfortunately, the details of his theory are often kept in veil. Late comers are very difficult to grasp the essence of his techniques. To the surprise of the reporter, Gann stroked a return of 1000% on his trading capital. He had made a total of 286 trades in 25 market days, 264 times won and 22 times lost. The profit rate was up to 92.3%. During that month, the average interval between trades was only 20 minutes. On one trading day, he made totally 16 trades, 8 out of them are the reversal points of the intra-day market fluctuation.

According to Gann's friend William Gilley, "One of the most astonishing calculations made by Mr. Gann was during last summer [1909] when he predicted that September Wheat would sell at \$1.20. This meant that it must touch that figure before the end of the month of September. At twelve o'clock, Chicago time, on September 30th (the last day) the option was selling below \$1.08, and it looked as though his prediction would not be fulfilled. Mr. Gann said, 'If it does not touch \$1.20 by the close of the market it will prove that there is something wrong with my whole method of calculation. I do not care what the price is now, it must go there.' It is common history that September Wheat surprised the whole country by selling at \$1.20 and no higher in the very last hour of trading, closing at that figure."

Based on number he predicted elections date; world war and so on.

Gann Theory is only theory which predicts time and price. We try to apply this theory for Indian market in a very very simplified manner.
