GOLD

CMP: 30581

Gold has important resistance for current week @ 30940. For current week teji should be done only above 30940. Intraday gold if breaks 30520 then 30370 is the target for gold and below 30300 bear will have upper hand till 29800. On upside target for gold is 31150

SILVER

CMP: 59378

Silver has good resistance at 59700-59750. If in coming week this zone is crossed then only do teji. Teji only above 59750 for target 60030 and 62000. Intraday mandi can be done with 59801 as stoploss. Once crossed 59800 then teji can be expected. BUT at current level, we want buyer to remain cautious. On downside market can come down till 58550.

COPPER

CMP: 438.7

Now 445 and 454 are good resistance for current week... Intraday short copper around 439.7 sl 440.6 T 436.5 and 432. If copper starts to trade below 430, February target for copper comes out to be 406. Current week important resistance is 441.

NICKEL

CMP: 944.7

Nickel has good resistance at 970. Advice to do mandi in 968-970 zone with 976 as stop loss and 930 as target for the week. If starts to trade above 980 then every dip is buying opportunity. For intraday and current week 954 is important level for nickel

NATURAL GAS

CMP: 192.4

192 to 197 is the level to go short. Intraday 186 is major hurdle if crossed 192 is resistance on upside Intraday go short in nat gas @ 192-193 sl 194.1

ZINC

CMP: 109.3

Good level to short is 111.2-111.5 with 112.1 as stoploss for current week. Target on downside is till 105.1

LEAD

CMP: 124

For intraday 125.5 is good level to go short with 126.7 as sl. Any pullback is now selling opportunity.

5060 is very crucial level for Jan month. if holds crude shall be heading towards 5250-5300. For current week 5120 and 5250 are important level. If market doesn't cross above 5250 then we can expect a small correction till 5130. And below this 5080 is the target
