CREATIVE IDEAS FOR BETTER INVESTMENT

## Free Seminar

Trading Techniques To Trade in NSE, MCX, Currency based on

W D Gann Technique Square of 9

&

Gift worth 3000/- free

**Day: Saturday Time: 10am to 1pm Date: Sep 13, 2014**

**Venue: Hotel Ashoka,** Nr Lakdi ka pool Bus stop, Khairatabad

**Hyderabad**

**Day: Monday Time: 5pm to 8pm Date: Sep 15, 2014**

**Venue: Hotel Alankar Inn,** Sambha murty road, Gandhi Nagar

**Vijaywada**

**Day: Wednesday Time: 5pm to 8pm Date: Sep 17, 2014**

**Guntur**

**Day: Saturday Time: 10am to 1pm Date: Sep 20, 2014**

**Vishakhapatnam**

**Day: Monday Time: 5pm to 8pm Date: Sep 22, 2014**

**Venue: Hotel Excellency,** Jhunjunbala Garden, Ashok Nagar, Railway station

**Bhubaneshwar**

**Day: Saturday Time: 10am to 1pm Date: Sep 27, 2014**

**Venue: Hotel Solitaire,** Madhava Nagar, off Race-course road

**Bangalore**

### NIFTY

**CMP: 8121**

ALL THE RATES ARE WITH RESPECT TO SPOT PRICE.

Book 50 % profit in all initiated call at the distance of stoploss

Be bullish in the market only if nifty trades above 8190..for current week..... Nifty is bullish for coming months till it trades above 8190 for the targets of 8400-8500 levels(in coming days).For intra week we are bearish in nifty with a stoploss of 8190 and target 7860

Always Make your trade no profit no loss by booking 50 % at distance equal to stoploss and for remaining wait for the targets.

**INVEST YOUR MONEY IN PENNY IN LEARNING IF YOU WANT TO BE ACE TRADER AND FIND THE PATH OF FINANCIAL FREEDOM**

### BANK NIFTY

**CMP: 16123**

Bank nifty has bullish view for coming week for the targets of 17000,17300 only if it trades above 16310.For intraweek banknifty has upper targets of 16500-16600.For intraweek banknifty our view is bearish if start to trade below 16000 then for short term 15500 15200 possible for current week.

### RELIANCE

**CMP:995.45**

Reliance for intraweek we are bearish if reliance trades below 990 for target 960 to 955....950-960 is good zone for going long in reliance .on upside bullish on reliance only above 1045.

### SBI

**CMP: 2568**

For current week sbin if trades below 2550 be bearish for target 2460-2470 and maintain stoploss of 2630...bullish on sbin only and only above 2630

<b>TATA STEEL</b>	<b>CMP:511</b>
<p>For monthly tatasteel has bearish out look for 430.In intraweek also tatasteel has bearish out look for 487.For the intraweek tatasteel can be sold below 509. for target 487...exactly previous week tatasteel bang on target Avoid to do teji in this counter</p> <p>For current week tatasteel if trades below 505 be bearish in tatasteel for target 466</p>	
<b>DLF</b>	<b>CMP:171.95</b>
<p>Dlf For the month dlf has bearish out look for the targets of 155,135.For intraweek dlf has bullish outllok only if it trades above 190 else it is going to drift down wards...our target for intraweek is 155-158 ...whi ch is good buying zone for dlf</p>	
<b>RELCAP</b>	<b>CMP:520.35</b>
<p>For the month reliance capital has bullish view for the targets of only if trades above 566 .For intraweek relcapital has bearish view below 540 for the target of 515 for current week.Last week reliance capital exactly bang in target zone</p> <p>For current week bearish in relcap below 510 for target 480 ..bullish in relcap only above 566</p>	
<b>SCRIPTS FOR LONG TERM</b>	
GAMMON INDIA	CMP :36
ACCUMULATE GAMMON INDIA BETWEEN 30-35 FOR SHORT TERM TARGET OF 64 AND 3 YEARS TARGET 270	
Syncom	cmp:10
ACCUMULATE SYNCOM BETWEEN 8-10 FOR TARGET 40 IN NEXT 2 YEARS	

We, @ Moneymint Consultancy, teach-train-coach in live market with 100% practical approach for TRADING to become a successful trader

## **Can market tops and bottom be predicted????**

**Yes yes yes!!!!!!!**

## **Answer lies in understanding square of 9**

The square of nine popularized by W. D. Gann is very reliable in determining market trends.

It is a useful market tool in almost all markets including indices, stocks, commodities, options and currencies. The numbers in the square of nine can be used as price levels of support and resistance and most importantly as time units. These numbers can be used to count minutes, hours, market days, calendar days, weeks, months and years.

Gann's most valuable contribution to analysis is square of 9 and squaring of price and time to analyse where the top and bottom of the market will be made.

How does it works on Indian stock market.....

We have analysed the intraday data nifty scripts to see whether market top or bottom are predetermined.....

Let us find out

We have taken many active scripts trading trading on intraday and found market tops and bottom out on the level mentioned

Come for seminar to know how everyday market tops and bottom out on the price mentioned.

If market top and bottom can be predicted for 1-2 scripts it can be by luck...but when more than 70% of script top and bottom can be predicted it is science.

Let us see how tops and bottom can be predicted.

**Square of nine can perfectly predict which level market will achieve.**

### **Gann swing techniques**

**Market is made up of bars and we will study this bars to identify trend of market.**

**Minor level trend analysis is carried out based on bars**

**Impulse and corrective wave are used to carry out long term trend analysis.**

**These 2 methods are used to carry out trend analysis.**

**Gann levels are used to identify zone for trading**

### **Method for long term investor**

- **Opportunity to multiply your money 5 times and more**
- **Learn to invest money where everybody is neglecting and at very less risk**

**Its 100 % guaranteed, your money will multiply in next3 years based on script you will select**

**All these techniques form part of "BECOME MASTER OF BULL AND BEAR SEMINAR**

## About Speaker: NileshSarda (BE)

NileshSarda, an Engineer, is trader by passion and profession .He has simplified Gann study for common man. Based on the studies a trader can predict tops and bottoms of market. *He has simplified various mathematical calculations* in easy language to interpret. Specially designed excel sheet for Square of 9, Gann levels, Range, are in ready format to trade in market. He makes sure, *every man who has urge to learn*, understands the concepts in very simple manner.

Every script or commodity has particular orientation for square of 9. And its implication is explained very well practically in live market. Gann Square of 9, Gann ABCD patterns, Gann emblem, time projection, Gann angel, Price Overlays, squaring of price and time methods are explained in very simple language for Indian market in live trading.

Major success includes predicting nifty top of 6300 and bottom 4570, silver top of 72000, Lead bottom of 89, zinc bottom of 89, crude bottom of 4480 are recent predictions the list goes on!!!!

Apart from all swings, highs and lows of all commodities and equity are predicted on daily basis on online portal [www.moneymint.net](http://www.moneymint.net) & [www.valuenotes.com](http://www.valuenotes.com)

Visiting Faculty in management colleges

Column writer for investment Magazine and Online portals

Trained more than 1000 participants to trade in market

Train people with practical approach to trade

**W. D. Gann**

**the legendary Financial Prophet in the Early Twenties**

To most of the technical analysts and financial traders, the name, William Delbert Gann, is well-known. Gann was one of the greatest traders in the early twenty centuries, who has extremely arcane trading analysis techniques and methods that based on ancient mathematics and geometry. Yet, as it was never unveiled explicitly, the theory of Gann is admired by most, but grasped by few. One of his important techniques, the Gann Square of 9, was said to be inspired from the structure of Egyptian and Indian temples. Unfortunately, the details of his theory are often kept in veil. Late comers are very difficult to grasp the essence of his techniques. To the surprise of the reporter, Gann stroked a return of 1000% on his trading capital. He had made a total of 286 trades in 25 market days, 264 times won and 22 times lost. The profit rate was up to 92.3%. During that month, the average interval between trades was only 20 minutes. On one trading day, he made totally 16 trades, 8 out of them are the reversal points of the intra-day market fluctuation.

According to Gann's friend William Gilley, "One of the most astonishing calculations made by Mr. Gann was during last summer [1909] when he predicted that September Wheat would sell at \$1.20. This meant that it must touch that figure before the end of the month of September. At twelve o'clock, Chicago time, on September 30th (the last day) the option was selling below \$1.08, and it looked as though his prediction would not be fulfilled. Mr. Gann said, 'If it does not touch \$1.20 by the close of the market it will prove that there is something wrong with my whole method of calculation. I do not care what the price is now, it must go there.' It is common history that September Wheat surprised the whole country by selling at \$1.20 and no higher in the very last hour of trading, closing at that figure." Based on number he predicted elections date; world war and so on.

**Gann Theory is only theory which predicts time and price. We try to apply this theory for Indian market in a very very simplified manner.**
