GOLD

CMP: 27349(JUN)

GOLD HAS STRONG resistance @ 28300 -28200. INTRADAY WE EXPECT A TARGET TO COME TILL 27760...till the time 28300 is not crossed just do mandi

Just see the fall as expected in Gold. Below **28000** Gold **C R A S H E D**. For next trading levels join our services

SILVER

CMP: 40797(JUL)

We are very bullish on silver target for 64000. Exact Entry and timing please join our subscription.

INTRAWEEK BULLISH ON SILVER ONLY IF TRADES ABOVE 43000. Short silver around 42600-42700 with 43001 as stoploss for target 40500 and 39000

Just see **43000** not crossed and silver still sliding

COPPER

CMP:410.85

Copper has best support at 390-395 zone and 428-430 is selling zone with 435. As stoploss.... NOW **THINK OF BUYING IN COPPER** in 390-395 zone... buy buy buy with 389.9 as stoploss and 412-413 as target. Now sell copper around 424-426 sl 428.1 as stoploss

Intraweek above 413 just think of buying

NICKEL

CMP:1141.6

Nickel short for intraweek with 1131 as stoploss for target 1010...above 1135 nickel heading for 1240 1320 and sharp fall around this levels

NATURAL GAS+	CMP:257
Natural gas has support at 260 and 245 and resistant at 295.Short natural gas around 295 with 298 as stoploss	
ZINC	CMP: 121.75
ZINC HAS RESITANCE @ 135-137 BAND . EXPECT MANDI IN ZINC IN THIS ZONE.IT HAPPEN AS EXPECTED NOW WHAT TO DO...120-118 best buying zone for zinc	
Lead	CMP: 123.6
LEAD INTRAWEEK RESISTANCE @ 142 AND 145.EXPECT MANDI IN THIS ZONE. WHAT NEXT IS 136 resistance JOIN US?122-124 act as support	
CRUDE OIL	CMP: 6120
CRUDE has best support around 5950. If trades below 5950 we expect crude to fall till 5750-5700	

Trades of May 26

Silver bought @ 40930 half booked @ 41130 & half holding earned of Rs.6900/-

Note: trading in 2 lots

We proudly say: Our accuracy is 60-70% on an average but 100 % you will be in profit

No trial calls at free of cost

5days trial @ 1500/- per 5 trading days Daily 4-5 calls

Charges Rs.7000/- per month Metals, Bullion, Energy

Newsletter subscription: Charges 2000/- per month and 5000/- per quarter(2 newsletter are provided for paid client in morning 1 in evening—only if major fluctuations

Portfolio advisory on capital above 10 lakhs or minimum 10 lots of gold and silver on sharing model

For Registration go to http://www.moneymint.net/free_trial.htm

We, @ Moneymint Consultancy, teach-train-coach in live market with 100% practical approach for TRADING to become a successful trader

Can market tops and bottom be predicted????

Yes yes yes!!!!!!!

Answer lies in understanding square of 9

The square of nine popularized by W. D. Gann is very reliable in determining market trends.

It is a useful market tool in almost all markets including indices, stocks, commodities, options and currencies. The numbers in the square of nine can be used as price levels of support and resistance and most importantly as time units. These numbers can be used to count minutes, hours, market days, calendar days, weeks, months and years.

Gann's most valuable contribution to analysis is square of 9 and squaring of price and time to analyse where the top and bottom of the market will be made.

How does it work on Indian stock market.....

We have analysed the intraday data nifty scripts to see whether market top or bottom are predetermined.....

Let us find out

We have taken many active scripts trading trading on intraday and found market tops and bottom out on the level mentioned

Come for seminar to know how everyday market tops and bottom out on the price mentioned.

If market top and bottom can be predicted for 1-2 scripts it can be by luck...but when more than 70% of script top and bottom can be predicted it is science.

Let us see how tops and bottom can be predicted.

Square of nine can perfectly predict which level market will achieve.

Gann swing techniques

Market is made up of bars and we will study this bars to identify trend of market.

Minor level trend analysis is carried out based on bars

Impulse and corrective wave are used to carry out long term trend analysis.

These 2 methods are used to carry out trend analysis.

Gann levels are used to identify zone for trading

Method for long term investor

- **Opportunity to multiply your money 5 times and more**
- **Learn to invest money where everybody is neglecting and at very less risk**

Its 100 % guaranteed, your money will multiply in next 3 years based on script you will select

All these techniques form part of "BECOME MASTER OF BULL AND BEAR SEMINAR

About Speaker: NileshSarda (BE)

NileshSarda, an Engineer, is trader by passion and profession .He has simplified Gann study for common man. Based on the studies a trader can predict tops and bottoms of market. *He has simplified various mathematical calculations* in easy language to interpret. Specially designed excel sheet for Square of 9, Gann levels, Range, are in ready format to trade in market. He makes sure, *every man who has urge to learn*, understands the concepts in very simple manner.

Every script or commodity has particular orientation for square of 9. And its implication is explained very well practically in live market. Gann Square of 9, Gann ABCD patterns, Gann emblem, time projection, Gann angel, Price Overlays, squaring of price and time methods are explained in very simple language for Indian market in live trading.

Major success includes predicting nifty top of 6300 and bottom 4570, silver top of 72000, Lead bottom of 89, zinc bottom of 89, crude bottom of 4480 are recent predictions the list goes on!!!!

Apart from all swings, highs and lows of all commodities and equity are predicted on daily basis on online portal www.moneymint.net & www.valuenotes.com

W. D. Gann
the legendary Financial Prophet in the Early Twenties

To most of the technical analysts and financial traders, the name, William Delbert Gann, is well-known. Gann was one of the greatest traders in the early twenty centuries, who has extremely arcane trading analysis techniques and methods that based on ancient mathematics and geometry. Yet, as it was never unveiled explicitly, the theory of Gann is admired by most, but grasped by few. One of his important techniques, the Gann Square of 9, was said to be inspired from the structure of Egyptian and Indian temples. Unfortunately, the details of his theory are often kept in veil. Late comers are very difficult to grasp the essence of his techniques. To the surprise of the reporter, Gann stroked a return of 1000% on his trading capital. He had made a total of 286 trades in 25 market days, 264 times won and 22 times lost. The profit rate was up to 92.3%. During that month, the average interval between trades was only 20 minutes. On one trading day, he made totally 16 trades, 8 out of them are the reversal points of the intra-day market fluctuation.

According to Gann's friend William Gilley, "One of the most astonishing calculations made by Mr. Gann was during last summer [1909] when he predicted that September Wheat would sell at \$1.20. This meant that it must touch that figure before the end of the month of September. At twelve o'clock, Chicago time, on September 30th (the last day) the option was selling below \$1.08, and it looked as though his prediction would not be fulfilled. Mr. Gann said, 'If it does not touch \$1.20 by the close of the market it will prove that there is something wrong with my whole method of calculation. I do not care what the price is now, it must go there.' It is common history that September Wheat surprised the whole country by selling at \$1.20 and no higher in the very last hour of trading, closing at that figure."

Based on number he predicted elections date; world war and so on.

Gann Theory is only theory which predicts time and price. We try to apply this theory for Indian market in a very very simplified manner.
