

Weekly 8th Sep Outlook

CREATIVE IDEAS FOR BETTER INVESTMENT

Free Seminar

Trading Techniques To Trade in NSE, MCX, Currency based on

W D Gann Technique Square of 9

&

Gift worth 3000/- free

Day: Saturday Time: 10am to 1pm Date: Sep 13, 2014

Venue: Hotel Ashoka, Nr Lakdi ka pool Bus stop, Khairatabad

Hyderabad

Day: Saturday Time: 10am to 1pm Date: Sep 15, 2014

Vijaywada

Day: Saturday Time: 10am to 1pm Date: Sep 17, 2014

Guntur

Day: Saturday Time: 10am to 1pm Date: Sep 20, 2014

Vishakhapatnam

Day: Saturday Time: 10am to 1pm Date: Sep 22, 2014

Bhubaneswar

GOLD

CMP:27378

Gold has strong supports around 27000-27100 levels. For intraweek gold below 27300 levels can be expected the targets 26800,26600....FOE CURRENT WEEK IF GOLD DOESNT BREAK 27300 THEN AGAIN A RALLY SHOULD START IN GOLDBUY BE BEARISH BELOW 27300

SILVER

CMP: 42013

We are very bullish on silver for the target of 64000. Exact entry and timing please join our subscription. For intra week silver will be bearish below 41800-41700 for the target of 40900-40800. IF 41700 NOT BROKEN SILVER WILL BE HEADED TOWARDS 43500....BE BEARISH ONLY IF SILVER TRADES BELOW 41700

COPPER

CMP:427.40

Copper has bearish view below 431-432 levels for the monthly target of 408-404. In intra week below 423 levels copper can touch 420,414 levels. For the day copper can be sold at higher levels for the targets of 423 levels. BE BULLISH IN COPPER ONLY ABOVE 432

NICKEL

CMP:1180

Nickel has strong monthly bullish view for the target of 1250. In intra week nickel can reach upper targets of 1220,1235 levels. For the day nickel above 1176 can reach 1192,1200 levels.

NATURAL GAS

CMP:231

Natural gas has strong monthly support around 227-228 levels. For the day natural gas can be sold below 233-232 for the targets of 228,226.

ZINC

CMP:144.3

Zinc has strong monthly support around 137-138 levels and can be expected to go 152-154 levels. For intraweek ZINC can be bought for the targets of 147,149 levels. For the day Zinc can be bought for the target of 146 with stoploss of 143.

Lead

CMP: 133

Lead has bearish view below 133 levels for the target of 128. For the day lead can be sold for the target of 131,130 levels.

CRUDE OIL

CMP:5642

Crude has crucial monthly support around 5650-5600. If crude trades below 5600 heavy bearishness can be expected and could fall up to 5425-5400. IF CRUDE DOESNT BREAK 5600 THEN PULL BACK CAN BE EXPECTED UPTO 5900

We, @ Moneymint Consultancy, teach-train-coach in live market with 100% practical approach for TRADING to become a successful trader

Can market tops and bottom be predicted????

Yes yes yes!!!!!!!

Answer lies in understanding square of 9

The square of nine popularized by W. D. Gann is very reliable in determining market trends.

It is a useful market tool in almost all markets including indices, stocks, commodities, options and currencies. The numbers in the square of nine can be used as price levels of support and resistance and most importantly as time units. These numbers can be used to count minutes, hours, market days, calendar days, weeks, months and years.

Gann's most valuable contribution to analysis is square of 9 and squaring of price and time to analyse where the top and bottom of the market will be made.

How does it works on Indian stock market.....

We have analysed the intraday data nifty scripts to see whether market top or bottom are predetermined.....

Let us find out

We have taken many active scripts trading trading on intraday and found market tops and bottom out on the level mentioned

Come for seminar to know how everyday market tops and bottom out on the price mentioned.

If market top and bottom can be predicted for 1-2 scripts it can be by luck...but when more than 70% of script top and bottom can be predicted it is science.

Let us see how tops and bottom can be predicted.

Square of nine can perfectly predict which level market will achieve.

Gann swing techniques

Market is made up of bars and we will study this bars to identify trend of market.

Minor level trend analysis is carried out based on bars

Impulse and corrective wave are used to carry out long term trend analysis.

These 2 methods are used to carry out trend analysis.

Gann levels are used to identify zone for trading

Method for long term investor

- **Opportunity to multiply your money 5 times and more**
- **Learn to invest money where everybody is neglecting and at very less risk**

Its 100 % guaranteed, your money will multiply in next 3 years based on script you will select

All these techniques form part of "BECOME MASTER OF BULL AND BEAR SEMINAR

About Speaker: NileshSarda (BE)

NileshSarda, an Engineer, is trader by passion and profession .He has simplified Gann study for common man. Based on the studies a trader can predict tops and bottoms of market. *He has simplified various mathematical calculations* in easy language to interpret. Specially designed excel sheet for Square of 9, Gann levels, Range, are in ready format to trade in market. He makes sure, *every man who has urge to learn*, understands the concepts in very simple manner.

Every script or commodity has particular orientation for square of 9. And its implication is explained very well practically in live market. Gann Square of 9, Gann ABCD patterns, Gann emblem, time projection, Gann angel, Price Overlays, squaring of price and time methods are explained in very simple language for Indian market in live trading.

Major success includes predicting nifty top of 6300 and bottom 4570, silver top of 72000, Lead bottom of 89, zinc bottom of 89, crude bottom of 4480 are recent predictions the list goes on!!!!

Apart from all swings, highs and lows of all commodities and equity are predicted on daily basis on online portal www.moneymint.net & www.valuenotes.com

Visiting Faculty in management colleges

Column writer for investment Magazine and Online portals

Trained more than 1000 participants to trade in market

Train people with practical approach to trade

W. D. Gann

the legendary Financial Prophet in the Early Twenties

To most of the technical analysts and financial traders, the name, William Delbert Gann, is well-known. Gann was one of the greatest traders in the early twenty centuries, who has extremely arcane trading analysis techniques and methods that based on ancient mathematics and geometry. Yet, as it was never unveiled explicitly, the theory of Gann is admired by most, but grasped by few. One of his important techniques, the Gann Square of 9, was said to be inspired from the structure of Egyptian and Indian temples. Unfortunately, the details of his theory are often kept in veil. Late comers are very difficult to grasp the essence of his techniques. To the surprise of the reporter, Gann stroked a return of 1000% on his trading capital. He had made a total of 286 trades in 25 market days, 264 times won and 22 times lost. The profit rate was up to 92.3%. During that month, the average interval between trades was only 20 minutes. On one trading day, he made totally 16 trades, 8 out of them are the reversal points of the intra-day market fluctuation.

According to Gann's friend William Gilley, "One of the most astonishing calculations made by Mr. Gann was during last summer [1909] when he predicted that September Wheat would sell at \$1.20. This meant that it must touch that figure before the end of the month of September. At twelve o'clock, Chicago time, on September 30th (the last day) the option was selling below \$1.08, and it looked as though his prediction would not be fulfilled. Mr. Gann said, 'If it does not touch \$1.20 by the close of the market it will prove that there is something wrong with my whole method of calculation. I do not care what the price is now, it must go there.' It is common history that September Wheat surprised the whole country by selling at \$1.20 and no higher in the very last hour of trading, closing at that figure."

Based on number he predicted elections date; world war and so on.

Gann Theory is only theory which predicts time and price. We try to apply this theory for Indian market in a very very simplified manner.
